

Farm & Consumer Automatic Nozzles

The F&C Automatic nozzles are designed for use with small 12 volt and AC utility pumps as well as larger farm and consumer pumps. M. Carder offers three different automatic nozzles to meet the needs of the different installations and operations.

The F&C nozzles are based on our standard nozzles with modifications to meet the special requirements of these types of pumps. All of the M. Carder F&C nozzles are equipped with our super strong stamped steel hook. The hook's unique design allows it to be swedged onto the spout so tight that it will not turn or loosen.

M. Carder Performance Advantages

- Micro touch valve for precise flow control
- Pure Teflon stem packing eliminates leaks
- Heavy duty swedged on hook
- Roto-Matic latch pin for smoother auto shut off
- Smartguard snap on scuff guard
- Super tough nylon hand guard

Nozzle Specifications

	5-Star	MF-1000	BM
